Austin Lane Technologies Redefining The Time Entry Market

Denton, TX – (March 3, 2017) – Austin Lane Technologies, Inc. today announced the worldwide release of the new ALMobile™ Grid Time Entry™. With customers across North America and 20 plus years as the leaders in field time tracking software, Austin Lane continues to design new features that help customers capture paperless time entry data – and now in a grid format.

"We are thrilled to be adding the Grid Time Entry to our ALMobile line-up. We are confident that this new design will expedite performance for foremen entering crews' time." said Austin Beaty, President of Austin Lane. "Whether it's looking at mobile time entry compliance, tracking equipment, or controlling time of subcontractors, customers want to work with us as their enterprise experts. This new product was developed in a collaborative effort with our broad base of customers." Beaty said.

ALMobile's Grid Time Entry combines newly designed grid style data capture and at-a-glance reporting with the expected state-of-the-art ALMobile features, making daily time entry simple for individuals or crews. This new addition works on all devices with seamless integration with the primary ERP.

"Customers describe our newest feature as the world's best, full function grid entry solution for a time tracking product." said sales manager, Kirk Pierce. "We are in the business of assisting our clients' complete projects more quickly and more profitably. This product achieves results from the outset." Pierce said.

This feature is now available with the purchase of ALMobile. A demonstration can be arranged by setting up an online webinar with Austin Lane sales team.
